

To Whom It May Concern,

I, Elmore Runee Harris, am contesting this summons. I have no knowledge of, or have been presented with documentation to support the Receiver's complaint my brief involvement with Oasis International Group was in anyway fraudulent. It is my understanding, until proven otherwise, that during my time as a lender of money to startup Oasis International Group, it was operating as a profitable business. Nevertheless, as with most startups, profitability is not instantaneous. I am not affirming any activity which occurred beyond my association with Oasis International Group where profitability is in question. From my reading of the complaint it does not state, nor is it clear, when Oasis International Group started to engage in unlawful practices.

I lent, not invested, funds to a friend and an associate for a startup business venture. I was not promised a return on the money I lent as if I was an investor. It was a loan.

I am unable to go back more than seven years to determine if I had deposited checks from Oasis International Group. Based upon my conversations with other people involved with the "clawback" the Receiver's information has been inaccurate. Therefore I request documentation of deposits I made into my account which correspond to the checks supposedly sent to me. I am also requesting documentation which shows during my brief association Oasis International Group it was engaged in a Ponzi scheme.

Sincerely,

Runee Harris
